

Anfiber Technology Limited

Anfiber Technology Limited, founded in 2005, is one of the largest manufacturers of Passive Optical Components and Active optoelectronic components products in the world, as a professional optical device manufacturer, and the factory is located in beautiful coastal industrial city, Shenzhen of China.

Our Company designs, manufactures and markets Broadband Light source, Optical Switch, Optical Isolator, Circulator, collimator, coupler, PLC-Splitter, WDM/CWDM/DWDM/MWDM/OADM, 1064nm Components, Polarization Maintaining and High Power Components and other fiber optic components and systems.

We are a highly professional and fast-developing company for fiber optic components and systems, and most of the daily activities are operated in its China factory which is located in Nanshan, Shenzhen, China

Our staff quantity is more than 8,80 and the workshop area is 9,000 square meters (about 97000 sq ft). We have a 10,000 level of purifications production workshop about 3000 square meters (about 33000 sq ft).

Currently we already have a dedicated team with many years of good experience in component design, engineering and manufacturing capabilities.

We also have established good business relationships & service support with reputable corporate customers from U.S., Europe & Asia, the Middle East, etc

Our Strength:

- Strictly adhere to Telcordia specification
- Provide comprehensive quality and reliability data and tests
- Provide custom designs per customer specifications
- Good supplier relationship
- Committed to enhance our outmost capabilities in technology,
- product design, development and manufacturing
- Emphasize on stringent quality control function, thereby ensure manufacture of premium quality products
- Maintain long term partnering relationship with customers and suppliers

Our Quality Standard:

- Anfiber emphasizes the importance of providing products of premium quality and performance to the industries
- We provide individual test data sheet for each product delivered with the capability of tracing the product should any failure should occur.
- We also ensure that all our products are supplied with a commitment to quality and consistency performance
